All Your IT Needs

InfoTech works with businesses of all types to help them grow in the modern business world. Our team specializes in creating technology solutions for the following industries:

LEGAL

HEALTHCARE

REAL ESTATE

CONSTRUCTION

PROFESSIONAL SERVICES

Our partnership of network providers allows us to be your one stop shop for all of your technical needs. Contact our team today and get started with a free assessment.

Our Services

InfoTech provides small and medium size companies cloud services to meet the demand of modern business, security and mobility. Protected by three factor authentication and 24x7 manned security, our data centers are compliant with industry and healthcare standards.

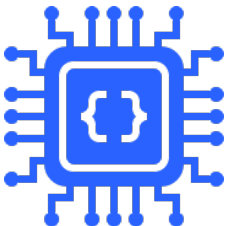

HELPDESK SUPPORT

When you need technical support we're available through multi channels of communication. Our team of experts will help support your business to ensure technical requests are resolved quickly and efficiently. Down time is lost revenue and we respond quickly to keep your downtime to a minimum.

BACKUP & RECOVERY

Your data is the utmost importance to the survival of your business. Don't rely on retail products to keep your data safe. Our team of technicians will monitor your backup and recovery service every single day and ensure your data is being backed up and tested in the event of a disaster. We use a multi solution approach to ensure you data is backed up in more than one location to keep your business on the forefront of recovery in the event of a disaster.

HARDWARE ORDERING

The right type of computer system is essential for productivity to your business. Our experienced team will ensure you have the best system for your business that is fast and reliable without breaking the budget. From ordering the hardware to setting it up our team has you covered and will ensure a great experience.

BUSINESS VOIP

Traditional phone systems don't offer much flexibility. Businesses today need mobility and flexibility when it comes to communications. Our Business VOIP phone solution will ensure your communications are accessible from any location with internet access. The mobility of our system is great for users who need to make or receive phone calls whether they are in or out of the office. No need for hardware on site as we can host your Business VOIP phone system in the cloud. Our VOIP solution can cut your phones expenses down by as much as 80%.

NETWORK SECURITY

A modern threat protection approach to keeping your network safe starts with the right tools and services. Our team prevents network threats from accessing your environment vs the traditional approach which implements a fix once a breach has occurred. Keeping your network safe is our top priority and we keep millions of files safe every day for our customers.

OFFICE 365 HOSTING

As a partner with Office 365 our team of experts can manage the entire experience for your business. Our team takes care of all the backend work, purchasing, billing and implementing of the Office 365 products so you can focus only on using the products, not managing them.

ENDPOINT MONITORING

Computers and Servers are essential for businesses to run on. These devices can slow you down when not maintained properly. Our endpoint monitoring ensures problems are detected and resolved before they impact your business. Our 24/7 monitoring and remediation service ensure your systems are operating at peak performance.

ANTI-VIRUS PROTECTION

Cyber threats are all around us, don't rely on free anti virus products to protect your systems. Our managed anti virus solution will ensure your systems are protected against the latest threats which will minimize your downtime due to virus outbreaks. Our team will ensure your end points are protected with the latest updates and safeguarded with daily scans.

Contact Us

Don't guess when it comes to your business security and technology needs. Our team of experts will ensure your technology is running smoothly.
